PANEL5000-A152

Precision resistive touch screen, COM / USB optional, VGA / DVI signal input

Introduction

PANEL5000-A152 is ultra-thin industrial touch monitor that supports VGA and DVI inputs, front panel made of magnesium alloy with a PET film, support 12-24V DC power input, power interface uses Fastening Type Phoenix terminal, to prevent accidental removal during use; touch screen with high temperature five-wire resistive, with high sensitivity, dust and waterproof, anti-oil, with gloves may merit normal operation, touch screen flexibility to choose the COM port, USB port to communicate with the host.

PANEL5000-A152 front panel compliant NEMA / IP65 waterproof and dustproof standard, to prevent installation in the control cabinet because of the scene splashing water droplets and water vapor into the host and thus affect equipment operation; high-strength steel box structure, so that it can adapt to the harsh industrial site work environment, the most suitable for factory automation, machinery manufacturing, CNC equipment, textile equipment, communication networks, power automation and other industrial applications.
